

## Press Release

An integrated subway measuring a total length of 45 meters long and 11 m width has been built inside the Central Metro Station Concourse Level as part of providing a common corridor for passengers to reach both metro station and the subway.

The entrance to the subway is located in concourse level of the metro station entrance located in front the part station. The subway can be utilized by the passengers to cross the highly congested Poonamallee High Road to reach the Suburban Rail and Central Station Terminals safely.

The subway has been provided with escalators and stairway on both sides of the roads for providing the best facilities to the passengers. The subway has been provided with an additional exit in addition to the already existing entrance and exit.
