

'Metro Rail waste water treatment plant a success'

Chennai: The bio-sewage treatment plant of the Chennai Metro Rail that runs without electricity at CMBT station has completed a year. The anaerobic sewage treatment plant for 10 KLD capacity last year, a pilot project, saved a large quantity of water, said a statement. It added that the plant is a solution for builders and residential apartments, where residents suffer due to lack of knowledge of STP operation. The statement added that CMRL had launched another anaerobic sewage treatment plant at Guindy Station.
